

RPS Metrology origins are in the experience and the passion for research, development and production for articulated measuring arms which has begun since more than 30years. The first company named Garda Impianti, founded in the 1983 by one of the three shareholders: Raffaello Dalla Mariga, was specialized on the production of equipment and machines for the car-bodies repairs.

The same company, on the 1987, files the first patent and produce the really first mobile measuring arm, named CMS CAR3D. On the 1990 Garda Impianti presents the new mobile arm model named Space and Explorer: the really first arm with 7 axes.

On the work base of the previous years, on the 1993 the company Garda is founded. Garda develops further more the mobile products, presenting portable articulated arms, including the model Inspector. The cooperation on the technical and commercial field made by the three co-founders Raffaello Dalla Mariga, Paolo Perbellini and Stefano Recchia, together with respect and friendship, took the challenge on the market of the articulated measurement arms, and to found on the year 2015 the company RPS Metrology.

RPS Metrology shareholders, have decided to adopt the Quality Management System UNI EN ISO 9001:15, making available suitable human, instrumental and economic resources, in addition to the mandatory ones, for the improvement of the process quality, to pursue as a primary objective, the satisfaction of all requirements related to the customer requested services.

This Quality Policy is intended to be the reference framework for comparing and periodically reviewing the targets that aim at continuous improvement of the system, and which allows the organization to:

- ✓ Provide objective evidence to its customers of a substantial quality of the service offered, identifying their needs on time and providing quick and effective answers.
- ✓ Constantly analyze the context in which the organization operates to focus the targets to be achieved in the various areas.
- ✓ Plan and check periodically the processes, based on the risk analysis assessed.
- ✓ Ensure quality control of the overall process.
- ✓ Constantly improve the level of efficiency of processes.
- ✓ Ensuring the fulfillment of the requirements and the continuous improvement of the efficiency of its management system, by regular and scheduled training of employees and partners.
- ✓ Guarantee the full and complete satisfaction of the customers and interested parties in general.
- ✓ The management guarantees all the efforts necessary to continuously develop and manage the quality system with the cooperation of the entire organization.
